

Features

Leather-like Polyester Nonwoven CATENA™ MODENA™

This is a durable breathable leather-like non-woven fabric based on the technology of polyester nonwoven fabric. It is mainly used for automobile tonneau covers, taking advantage of its light weight, environmentally friendly features.

Based on polyester spunbond nonwoven fabric technology, it is a light and durable leather-like nonwoven fabric with breathability. It is mainly used as a tonneau cover material for automobiles taking advantage of its light weight and eco-friendly features.

Since it is based on polyester spunbond nonwoven fabric, there is no fray of fiber and good surface appearance. Due to its excellent performance in low temperature environment, the casing (packaging material, outer box, bag, cylinder) can be miniaturized.

It is possible to change the fiber material, weight and coating resins according to the required characteristics.

Locations

Main Office / Branch Office

- **Osaka Head Office**

Osaka Umeda Twin Towers South, 1-13-1 Umeda, Kita-ku, Osaka City,
Osaka, Japan 530-0001
