

Rope

IZANAS® is used for mooring ropes on ultra-large ships such as 250,000t or 300,000t class (ore carriers, crude oil tankers, LNG tankers, etc.).

Fishing Line

Not only boat fishing or casting, IZANAS® is challenging new fishing line markets such as jigging, egging. IZANAS® fishing line is a braided structure which is different style from mono-filament line. Higher strength, Higher sensitivity, IZANAS® continue to evolve.

Net

The nets made from IZANAS® are thin and light.

Because these nets do not block the view of fields, they are used for safety nets in ballpark, golf field and other sports fields.

Backpack

IZANAS® has high tenacity and excellent wear resistance and weather resistance. In addition, its lightweight makes it possible to reduce the weight of backpack products.

Mortar Reinforcement

Adding an appropriate amount of IZANAS® chopped fiber to mortar reduces the width of cracks and makes cracks less noticeable.

Additionally, the bending strength and bending toughness of mortar are greatly improved, providing a reinforcing effect.
