## **TOYOBO MC Corporation to exhibit at “FILTECH 2026”**

**~One of the World’s Largest Filtration Technology Exhibition~**

---

TOYOBO MC Corporation (hereinafter “TOYOBO MC”) will jointly exhibit with TOYOBO group company, TOYOBO Chemicals Europe GmbH (hereinafter “TEU”), at FILTECH 2026, one of the world’s largest exhibitions for filtration technology, to be held in Cologne, Germany, from June 30 to July 2.

FILTECH 2026 is expected to host nearly 600 exhibitors, showcasing the latest technologies in liquid/solid separation and gas/particle separation.

At the exhibition, TOYOBO MC and TEU will showcase a range of products, including biomass electrostatic filter, dust removal & deodorization filter, and gas removal filter (honeycomb type). Through these exhibits, we will highlight the technical advantages of these products as well as their applications.

In particular, biomass electrostatic filter maintains the high electrostatic charge performance and collection efficiency of the conventional products, while incorporating 30–50% biomass-derived resin materials. This enables a reduction in greenhouse gas (GHG) emissions by approximately 20–40% compared to conventional products.

We look forward to welcoming you at our booth.

### **1. Products**

- Biomass electrostatic filter
- Dust removal & deodorization filter
- Gas removal filter (honeycomb type)

### **2. About the Exhibition**

- Duration : June 30–July 2 , 2026 9:00–18:00 (until 17:00 on the final day)
- Venue : KoelnMesse Halls
- Booth No. : Hall 7 - K1
- Exhibition website : [FILTECH2026](https://www.filtech2026.com)
